

## Task 1: Five Reasons for Creating a Conceptual Data Model

1. Foundation for System Design:
2. Enhanced Communication:
3. Requirement Validation:
4. Scope Definition:
5. Facilitates Flexibility:

## Task 2: Examples of Conceptual Models and Physical Models

### Conceptual Models:

1. Entity-Relationship Diagram (ERD):
2. High-Level Use Case Diagram:

### Physical Models:

1. Database Schema:
2. Physical Data Flow Diagram (PDFD):
